

Directions. On the home page, click "Back to top". You are now on the page for "Action Games", click "Home". How do I install the trainer file? 1. Change the current folder from "Program Files (x86)". For Windows 8, it would be "Program Files". 2. Change the file name to match the trainer file and rename it to the trainer file extension. 3. Extract the trainer file. 4. Double-click on the trainer file, wait for the installation to complete and be happy! How do I uninstall the trainer file? 1. Change the current folder from "Program Files (x86)". For Windows 8, it would be "Program Files". 2. Change the file name to match the trainer file and rename it to the trainer file extension. 3. Extract the trainer file. 4. Double-click on the trainer file, wait for the installation to complete and be happy! ** FAQ ** Q: "Does the trainer really work? It doesn't seem to do anything!" A: This happens to be a common bug. If this happens to you, then you have to use the trainer file and use trainer at the main menu. Q: "The trainer isn't working at all." A: Please double-check for these errors: 1. You need the "edittrainer.exe" file. 2. You need to have the trainer file and the trainer located in the same folder. 3. Do you have any problems with the permission? The trainer needs the "read" and "write" permissions. *** TRADER COMMENTS *** Name: Connor Isom Link: Version: 1.01 Date: Dec 14, 2018 Date: Version 1.01 Price: \$2.74 Region: USA Price: \$4.99 . *** TRADER COMMENTS *** Name: CJ Mercer Link: Version: 1.08 Date: Dec 17, 2018 Date: Version 1.08 Price: \$3.49 Region: UK Price: \$5.99 . *** TRADER COMMENTS *** Name: Omar Garcia Link: Version:
