What should i do to get a sharp image? Note: I have tried many methods as Normalize, Anti-Aliasing (CA filter) and methods using ImageMagick and Photoshop. However i get a blurred image. A: The problem with that picture is the focus. It's impossible to get away from it, as your camera will always be focused on something at the centre of the frame (unless you have a focus plane, which will also be in the centre). Without getting into too much detail, your best bet 3e33713323
